THE TOWNS OF ARIZONA!

The Sister Territory Supplies Our Readers With Good Paragraphs.

BREVITIES CULLED FROM OUR EXCHANGES.

FLAGSTAFF.

From the Gem.

The mercury stood six degrees below zero here Tuesday morning for a short time.

Flagstaff needs a first class opera house and she is going to have it before many months.

The prospects for Flagstaff as a spring watering grows brighter as spring approaches.

The establishment of a flouring mill here has been under consideration by some of our agriculturists.

Work on the foundation of the postoffice building has been suspended on account of the heavy fall of snow.

E. S. Gossage and wife, who have been on a visit to Chicago and the east for the past month have returned home.

Hank Smith, while alighting from a stage fell on an ax and received a very ugly gash in his arm near the wrist.

Captain Frank Hocherder has received the invoice of the new uniforms for Company I. The clothing will be here in a few days.

George Campbell and Hank Ward boarded passenger train No. 1, bound for Klondike to gather gold. Their many friends here wish them unlimited success and a safe return.

Work was commenced near the fort, eight miles north of Flagstaff to develop water to supply the system of water works that the city contemplates putting up early in the spring.

Miss Emma Ingram, of Burlington, Iowa, has arrived and will make Flagstaff her home. Miss Ingram is a niece of our accommodating postmaster, T. J. Coalter, and will assist him in the post office.

Miss Greer, while suffering with headache, after applying a remedy for same and not receiving immediate relief, took some of the medicine inwardly and physicians had to be summoned to relieve her from the dangerous effects of the drug.

Mrs. L. S. Drum and another lady were out buggy riding near the Verde last week, when the horse became frightened and ran away, throwing both ladies out of the buggy and bruising them considerably, especially Mrs. Drum. She was hurt about the neck, but not seriously.

Prescott.

Geo. F. Harrington and Owen F. Place are en route to Edinburg, Tex., to attend a meeting of the directors of the Crowned King Mining company, January 30.

A very rich specimen of gold rock, which goes for \$50 per ton, can be seen at the Windsor. It comes from the Klondike claim, Copper Basin district. The mine is owned by Messrs. Griffin & Roberts. The ledge is about sixteen inches wide; pay streak six inches wide.

J. F. Wilson, ex-attorney general of Arizona, has formed a co-partnership in the law practice with Eugene B. O'Neill, of Prescott.

J. H. Lee, of the American ranch, has sold all of his cattle and brand to J. H. Caldwell, of Williamston valley. The price reported is \$10,000. Mr. Lee expects to leave next month for Seattle, and expects to go up to the Yukon country in the spring.

Winslow.

Billy Burke has been slightly under the weather for the past few days, but his illness is not of a serious nature. Close attention, good nursing and kind treatment, which he is receiving, will soon put him on his pins as good condition as ever.

Winslow has been visited by several little flurries of snow during the week. The fall in the mountains, judging from the clouds, must have been unprecedentedly heavy.

Mrs. James Watson returned to her home in our city last Sunday morning from Brandon, Wis., where she accompanied the remains of her husband to have them interred in the family burying ground.

Col. D. Thurston, who has been sojourning in the southern part of the territory for two or three months past, returned to the latter part of last week.

Arizona at Large.

The steamer Mohave returned from the upper Colorado to Yuma, bringing a cargo of sugar and lead ore for shipment to San Francisco.

A young Mexican boy in Bibbee last week climbed up a slag dump to warm and accidentally climbed on a red-hot piece, and was burned so badly that he died soon thereafter.

Twenty-three Indian pupils from Arizona, are attending the Indian school at Carlisle, Penn., as follows: Apaches—13 males and 7 females; Papagos, 8—2 males and 6 females.

Messrs. Horace Merrill and Dr. Hawkins have returned to Jerome from a hunting trip in the foot hills of the Mogollon mountains. They killed three deer and report game very plentiful.

Governor McCord in his report estimates that Arizona has between \$5,000 and \$6,000 population. He bases his estimate on the voting population of the territory, which in 1890, according to the various registration lists was \$30,168, and the vote actually cast 14,000.

Articles of incorporation of the Yukon Mining and Trading company, a Los Angeles company, was filed in the office of the county recorder at Phoenix. The capital stock is \$150,000. The incorporators are George T. Child, E. Mac Phottage, Charles H. Rose, John Sanders, James Hall, Jeremiah C. Mahoney, Ernest Lawrence, William A. Barry and Arthur L. Cullum.

The Nephel school house, three miles this side of Mesa, was burned, evidently by incendiary, on Monday night. W. S. Varnum, the teacher, arrived in Phoenix before daylight Tuesday morning after the municipal bloodhounds

dermie medication of climatic influence will eradicate the bacillus. The relief of a cough, of course, does not constitute a cure.

"The organs of respiration will admit but one element safely, that element is air. The trachea instinctively closes when the introduction of any liquid or powder is attempted. But fresh and pure air can be thoroughly impregnated with germicidal and antiseptic agents, and then introduced into the most delicate recesses of the organs of respiration without effort or inconvenience on the part of the patient.

"One of the most striking features of the system employed at the San Gabriel sanitarium is that the germicidal and antiseptic properties with which the air is impregnated are so thoroughly penetrating that every part of the respiratory organs are reached, even the parts not reached by any ordinary inhalation in the case of the diseased lungs.

"The plan of successfully introducing these germicidal and antiseptic agents into every part is effected in three ways, all three of which are employed in every case.

"Fresh air is drawn from the outer atmosphere by a vacuum pump and forced under moderate pressure through a battery of cylinders containing germicidal and antiseptic preparation and become impregnated with germicidal and antiseptic properties. In passing through trying tanks after the air becomes impregnated, it is made dry and pure, and in the medicated, dry and pure state it is introduced into the apartments of the patients through the ventilation system.

"In the second place, each room occupied by a patient is fitted with one of the nebulizers, used only in the pneumatic system of treatment, which is arranged to saturate the air of the apartment by evaporation every hour of the day and night with an aromatic germicidal and antiseptic vapor. This only supplemental to the first application.

"Third, a special treatment room is in use in every one of these sanitariums, in which the volatilized germicide is more concentrated than is possible in the ordinary living apartments. The patients are required to sit in this room amidst the dense and penetrating fumes three times daily for a time ranging from ten to twenty minutes.

"All these deductions and this method are based upon the germ theory and its etiological relation to tuberculosis. It is well known that the germicidal agents capable of destroying the germ or rendering it innocuous, are those which are aseptic conditions to which the germ is not antiseptic agents. This theory is so firmly engrained upon the public mind that should a surgeon treat a disease or injury without due regard to sepsis or neglect to render the surroundings of his patient aseptic, he would be held guilty of criminal negligence. That this theory should be employed in the treatment of tuberculosis is not only rational and reasonable but strictly consistent with therapeutic law.

"The San Gabriel sanitarium, after which the Albuquerque sanitarium will be modeled as nearly as possible, is operated upon the plan of an extensive hotel or resort, where the treatment is an additional feature. Although the patients remain the most of the time in their rooms, where they need not be conscious of the treatment that the medicated air is effecting, except through the results, they are given every means of passing pleasant hours in the parlors below.

"It is not expected by this treatment that lungs will be made to rot, but it is claimed that the affected member is freed from the disease, and that the nature is then in time to rebuild the wasted parts. The desired results are attained by keeping the healthy tissues sterilized and thereby securing them from further proliferation of the bacilli. All tissue reached by the circulation of the blood, as well as the respiratory surface, is sterilized. By inhalation the medicated vapor is brought into forced contact with every part of the lungs, where it is diffused and absorbed and the blood impregnated with it. The bacillus thus surrounded, intrudes itself in the future, thus becomes encased, and is beyond the reach of bacilliemia, due to the lack of vascular supply in its habitat. But having encompassed the aggressive capability of the bacillus, its life is short for lack of nutriment and by reason of caecous degeneration. The degeneration of the tubercle which follows exposes the little element to the action of antiseptic germicidal vapor, and those not ejected by expectoration are in an atmosphere antagonistic to their causing further infection.

"This treatment is what is in successful operation at San Gabriel, and at other places, and what is proposed for Albuquerque. No form of stachic or hypodermic medication of climatic influence will eradicate the bacillus. The relief of a cough, of course, does not constitute a cure.

PROFESSIONAL CARDS.

DR. FRANCIS CROSBY.

OFFICE AND RESIDENCE 400 West 10th Street. Hours: 9 to 10 a. m. 2 to 5 p. m. Special attention given to general surgery. Automatic Telephone 222.

DRS. RISHOF & HERF.

HOMOPATHIC PHYSICIANS AND Surgeons—Office and residence over postoffice. Telephone No. 100. Office hours, 9 to 10 a. m. 2 to 5 p. m. 7 to 8 p. m. 9 to 10 a. m. and 7 to 8 p. m.

JOHN TACHER, M. D.

PHYSICIAN AND SURGEON—Office and residence, 107 North 10th Street. Hours: 9 to 10 a. m. 2 to 5 p. m. 7 to 8 p. m. 9 to 10 a. m. and 7 to 8 p. m.

DR. J. S. DICKSON.

ARCHITECT—Plans, specifications and estimates furnished for all classes of building and architectural work. Office: 206 West Railroad Avenue.

BAKERDAY & BAKERDAY.

OFFICE AND RESIDENCE, No. 112 West 10th Street. Hours: 9 to 10 a. m. 2 to 5 p. m. 7 to 8 p. m. 9 to 10 a. m. and 7 to 8 p. m.

W. G. HOPKINS, M. D.

OFFICE HOURS—9 to 10 a. m. and from 1 to 2 p. m. 1 to 2 p. m. and 7 to 8 p. m. Office and residence, 200 West 10th Street, Albuquerque, N. M.

E. J. ALGER, D. D. S.

DENTIST—Office, rooms 3 and 4, Whiting street. Office hours, 9 to 10 a. m. 2 to 5 p. m. and 7 to 8 p. m.

BENJAMIN S. HODGE.

ATTORNEY-AT-LAW, Albuquerque, N. M. Prompt attention given to all business connected with the law. Will practice in all courts of the territory and before the United States land office.

WILLIAM D. LEE.

ATTORNEY-AT-LAW, Office, room 7, N. T. Armijo building. Will practice in all courts of the territory.

JOHN S. FINCH.

ATTORNEY-AT-LAW, Albuquerque, N. M. Office, rooms 8 and 9, First National Bank building.

FRANK W. CLANCY.

ATTORNEY-AT-LAW, rooms 2 and 3, N. T. Armijo building, Albuquerque, N. M.

R. W. DEBSON.

ATTORNEY-AT-LAW, Office over Robinson's grocery store, Albuquerque, N. M.
